Experience

Data & Systems Analyst, Hofman Hospitality Group

June 2023 – Present (3 Yrs.)

- Migrated data consumption off a sunseting Oracle DB by building an in-house API-to-Postgres ingestion pipeline, creating a reliable connection, and **saving company \$4860 annually** in subscriptions costs.
- Led a large-scale beverage sales retention analysis across multiple stores by defining key metrics, building executive dashboards, and presenting findings that identified approximately **\$580k in annualized uncaptured revenue**.
- Built Google Apps Script tools using JavaScript to automate recurring reports and data loads in Google Sheets, providing Operations leaders and managers across **27 stores with reliable weekly reporting**.
- Optimized and executed SQL queries across Snowflake, Oracle, and Microsoft SQL Server to support ad hoc analysis, dashboard development, and large-scale reporting needs.
- Built and maintained Preset dashboards for Operations, Finance, and Marketing stakeholders, replacing manual reporting workflows with centralized, automated insight hubs.
- Supported financial reporting and analysis in Excel using pivot tables, nested formulas, and macros to clean, restructure, and prepare data for recurring business reports.

Product Data Management Analyst, Rivian Automotives

Nov 2021 – June 2023 (1.7 Yrs.)

- Built Python and Power BI dashboards to centralize purchasing, parts cost, and inventory risk data, enabling faster variance analysis and more informed procurement prioritization.
- Developed Tableau dashboards connected to Redshift, giving the validation team visibility into ticket queue health and release accuracy while helping reduce test-phase rework caused by inaccurate or incomplete release details.
- Maintained and optimized SQL logic behind reporting datasets, improving data quality, report reliability, and consistency across dashboards.

Skills

Languages: SQL, Python, VBA, TypeScript

Tools: Excel, Tableau, Power BI, Superset, DOMO, StreamLit, AppScripts, Codex, Claude

Cloud & Data: Snowflake, Big Query, Redshift, PostgreSQL, Data Fusion, Riverty, Hevo, ETL/ELT Data Pipelines

Other Experience
